Honeywell

Scanning barcodes – fast and reliable

The Honeywell barcode scanner is built to withstand any condition.

ScanPal EDA52 is a next-generation mobile computer from Honeywell, equipped with the latest 2.0 GHz Qualcomm Snapdragon octa-core processor and robust wireless connectivity through NFC, Wi-Fi 5, Bluetooth 5.1 and 4G LTE communication. The EDA52 features the brand new and powerful Honeywell S0703 scan engine which enables fast reading even of damaged or incomplete barcodes.

Powerful, convenient and smart

Thanks to its lightweight and slim design, the ScanPal™ EDA52 can be operated with one hand and easily carried in your pocket. The distinctive 5.5-inch Gorilla Glass touchscreen surface and ergonomic industrial design enhance comfort and user experience.

The EDA52 is equipped with a rugged housing and IP67 rated sealing to withstand stress during operation and demanding environmental conditions. A 4500 mAh battery allows for prolonged and uninterrupted use between each charge.

Features and benefits

Reliable and secure connectivity

\ Powerful hardware platform

\ Full 5.5 inch touch screen

\ Fast connectivity via WLAN, WWAN, Bluetooth 5.1

\ Removable 4500 mAh lithium-ion battery with a capacity of more than 12 hours

\ Easy scanning even of damaged barcodes

\ Android 11 operating system; can be upgraded to Android 13*.

GLOBAL LEADER

Honeywell Safety and Productivity Solutions (SPS) offers products, software and connected solutions that improve productivity, workplace safety and asset performance for our customers around the world.
